**Fountain Valley, CA.** CASI Software, innovators in the development of mainframe information transformation and delivery technologies, today announced the release of JES<sup>2</sup>Mail /JES<sup>2</sup>FTP version 4.8.

JES<sup>2</sup>Mail and JES<sup>2</sup>FTP transform JES and sequential file report content into PDF, XML, HTML and other formats; enhance the output with advanced PDF Overlays (forms), encryption and password-protection; and deliver the results to email in-boxes and network servers. Release 4.8 contains all post release 4.7 software maintenance and offers a number of product enhancements, including improved PAGEDEF conversion mapping, PDF DUPLEX support, and expanded EXIT interfaces.

The Report Processing Language (RPL) facility has been enhanced to accommodate increasingly complex document composition statements when customers convert complex PAGEDEF mapping schemas. This allows for an easier and speedier transition from PAGEDEF mapping to PDF Overlay generation.

PDF DUPLEX printing directives can now be specified within the PDF as well as the specific PDF page to be viewed when the document is opened.

In addition, the existing JES<sup>2</sup>Mail /JES<sup>2</sup>FTP EXIT interface has been expanded to allow greater interaction between the Exit COMMAREA and RPL scripting facility.

And finally, the free, simple messaging version (JES2Mail-Lite) is no longer available. A more functional version of JES2Mail-Lite (renamed JES2Mail-Lite PLUS) can now be licensed for a low annual cost.

Release 4.8 is available to all current maintenance customers and can be downloaded directly from [www.casisoft.com](http://www.casisoft.com). For prospective customers, CASI continues to offer free, no obligation 45-day trials and support with proof-of-concept applications during the trial period.

More information on JES<sup>2</sup>Mail/JES<sup>2</sup>FTP can be found at [www.jes2mail.com](http://www.jes2mail.com) or by contacting CASI by email at [info@casisoft.com](mailto:info@casisoft.com) or by telephone at 714-378-1109.

### About CASI Software

*CASI is a provider of System z information delivery solutions. From the creation of EMS, one of the first mainframe-based email and forms management products, to its JES<sup>2</sup>Mail/JES<sup>2</sup>FTP suite for modernizing, securing and delivering mainframe report content, CASI has over 20 years' experience providing z/OS innovations that provide both hard dollar cost savings and productivity improvements. CASI is located in Fountain Valley, CA. More information on CASI and all its products can be found at [www.casisoft.com](http://www.casisoft.com).*
