Fountain Valley, CA. CASI Software, innovators in the development of IBM z/OS information transformation and delivery technologies, today is pleased to announce the release of **JES2Mail /JES2FTP version 5.2**.

JES2Mail and JES2FTP transform JES and sequential file report content into PDF, XML, HTML and other formats; enhance the output with advanced PDF Overlays (forms), encryption and password-protection; and automatically deliver the results via email, to network servers, or using RSS web feeds. Release 5.2 is both a roll-up of all software maintenance since v5.1 and includes several significant product enhancements.

- **Expanded JES2Mail Email Security** includes SSL/TLS connections for SMTP email with AUTH. JES2Mail can connect to the email server in an encrypted session and perform an AUTH sign-on at the target server with an authorized username and password.
- **RPL and PDF Overlay Enhancements** include <Tag>, Wrap, and Justify support in PageLayout. These new options allow more dynamic font and color changes and an array of strings to be 'wrapped' and 'justified' in text rendering on the PDF page, resulting in greater flexibility in custom letter, notice, and statement creation.
- **Report2Mail/FTP for Windows** is an MS-Windows version of JES2Mail/FTP. This version is identical to the z/OS version (other than JES interface) and supports use of all RPL and PDF Overlays 'as is'. Initially an internal development and testing tool, it is now available to all current JES2Mail/FTP customers for their own testing, development, pre-production and (even) server-based production use. Contact CASI Support for more details.

General availability of JES2Mail/FTP 5.2 is scheduled for October 15, 2019 and will be available for download directly from the CASI Software website (www.casisoft.com) by all current maintenance customers. CASI continues to offer free, no obligation trials of the full JES2Mail/JES2FTP product suite and provides proof-of-concept technical support during the trial period.

Visit www.casisoft.com for more information or contact CASI Software by email at info@casisoft.com or telephone at 714-378-1109.
