**Fountain Valley, CA.** CASI Software, innovators in the development of mainframe information conversion and delivery technologies, today announced the release of JES<sup>2</sup>Mail / JES<sup>2</sup>FTP 4.5.

JES<sup>2</sup>Mail / JES<sup>2</sup>FTP transforms JES and sequential file report content into PDF, XML, HTML and other formats; enhances the output with advanced PDF Overlays (forms); encrypts and password-protects the output; and delivers the results to email in-boxes and network servers. Release 4.5 adds the following key security and report enhancement capabilities: AES-128 encryption for PDF output, embedded PDF file attachments, and simplified MAP scripting for PDF Overlay rendering.

“We take advantage of newer Adobe Acrobat™ capabilities to add AES encryption and the embedding of other files within the PDF. As a result, JES<sup>2</sup>Mail / JES<sup>2</sup>FTP now provides stronger encryption for the final-form PDF document and any attachments or other information delivered to end users or network systems,” states Bob LaBayne, Vice President of Product Development of CASI Software.

“Providing the ability to graphically add content positioning to the PDF Overlay further simplifies the creation of enhanced PDF output, which has long been a hallmark of JES<sup>2</sup>Mail / JES<sup>2</sup>FTP,” adds Randy Benderman, Vice President of Customer Support at CASI.

Release 4.5 is available to all current maintenance customers at no additional charge and can be downloaded directly from [www.casisoft.com](http://www.casisoft.com). For prospective customers, CASI continues to offer free, no obligation 45-day trials and direct support with proof-of-concept applications during the trial period.

More information on JES<sup>2</sup>Mail / JES<sup>2</sup>FTP can be found at [www.jes2mail.com](http://www.jes2mail.com) or by contacting CASI by email at [info@casisoft.com](mailto:info@casisoft.com) or by telephone at 714-378-1109.

### **About CASI Software**

*CASI is a provider of zSeries information delivery solutions. From the creation of EMS, one of the first mainframe-based email and forms generation products, to its popular JES<sup>2</sup>Mail / JES<sup>2</sup>FTP suite for modernizing, securing and delivering mainframe report content, CASI has over 20 years' experience providing zSeries innovations that provide both hard dollar cost savings and productivity improvements. CASI is located in Fountain Valley, CA USA. More information on CASI and all its products can be found at [www.casisoft.com](http://www.casisoft.com).*
